

Invitation to Tender — ITT-2026-0905

Facilities Management Framework (Synthetic Sample)

Synthetic document weighted toward COMPLIANCE/policy-alignment risk so the compliance specialist flags clauses that conflict with corporate procurement policy and the workflow escalates to human review.

1. Scope of Works

The Supplier shall provide integrated facilities management — cleaning, security, catering, and maintenance — across the Company's national estate for thirty-six (36) months.

2. Delegation of Authority Override

The signing manager may approve unlimited variations, additional spend, and contract extensions without finance, legal, or board approval, notwithstanding any internal delegation-of-authority limit.

3. Single-Source Award

This framework is awarded without competition, and the Supplier may be appointed to future related contracts directly, without tender, for the life of the relationship.

4. Subcontracting Without Checks

The Supplier may subcontract any portion of the works to any party without due-diligence, right-to-work, modern-slavery, or anti-bribery screening, and without Company consent.

5. Anti-Bribery and Hospitality

The Supplier and Company personnel may exchange gifts and hospitality of any value, and such exchanges need not be recorded in any register.

6. Insurance Floor Waived

The minimum insurance levels mandated by Company policy are waived; the Supplier may carry whatever cover, if any, it chooses.

7. Conflict of Interest

Company evaluators with a personal or financial interest in the Supplier may participate in award and performance decisions without declaration or recusal.

8. Health, Safety, and Environmental

Statutory health, safety, and environmental obligations are deemed satisfied by the Supplier's self-certification, with no audit right for the Company.

9. Data Protection Compliance

Compliance with applicable data-protection law is optional where the Supplier considers it commercially impractical.

10. Record Keeping

Neither party is required to retain records of decisions, approvals, or payments under this framework.
