

Invitation to Tender — ITT-2026-0904

Citizen Identity & Analytics Platform (Synthetic Sample)

*Synthetic document weighted toward INTELLECTUAL-PROPERTY and DATA-PROTECTION risk so the

IP & data specialist flags high-risk clauses and the workflow escalates to human review.*

1. Scope of Works

The Supplier shall build and host a citizen identity verification and analytics platform processing personal and special-category data for the Authority.

2. Irrevocable Background IP Transfer

All software, algorithms, trained models, configuration, tooling, and pre-existing background intellectual property used or adapted by the Supplier shall transfer irrevocably to the Authority at no additional cost, including the right to sublicense to any third party.

3. Source Code and Model Escrow

The Supplier shall deposit full source code, model weights, and training data in escrow, released to the Authority on demand for any reason, with an unlimited, royalty-free, perpetual right to modify and redistribute.

4. Sole Responsibility for Data Breaches

The Supplier shall be solely liable for all security incidents and personal-data breaches affecting the platform, including breaches caused by Authority personnel, third-party APIs, or end users, and shall bear all remediation, compensation, and regulatory costs without cap.

5. One-Hour Breach Notification

The Supplier must notify the Authority, all affected data subjects, and all relevant regulators within one (1) hour of any suspected or confirmed incident, regardless of severity or confirmation status.

6. Unlimited Data Use Rights

The Authority may use, share, and commercialise all data processed under the contract, including personal data, for any purpose, and may direct the Supplier to transfer data to jurisdictions without an adequacy decision.

7. No Sub-processor Protections

The Supplier remains fully liable for any sub-processor but may not impose back-to-back data protection terms, and the Authority may mandate sub-processors of its choosing.

8. Retention and Deletion

The Supplier must retain all data indefinitely and simultaneously delete it on demand within one hour, certifying complete destruction across all backups.

9. IP Indemnity Without Cap

The Supplier indemnifies the Authority against all intellectual-property and data-protection claims without financial limit, including claims arising from Authority instructions.

10. Audit

The Authority may audit the Supplier's systems, source code, and models at any time without notice and copy any materials it considers relevant.
